Meetings of the Membership

Four dinner meetings are scheduled yearly by the Association. These meetings feature prominent speakers on topics of science content, supervision, innovative programs, pedagogy and philosophy.

These meetings are partially underwritten by contributions from publishers and suppliers, whose science materials are available for review at the meetings. This allows the organization to provide quality programs and dinners at well below their actual cost, and permits our members to become familiar with new science programs and materials and to meet with representatives of the sponsoring organizations.

In addition, CSSA and the Connecticut Science Teachers Association jointly sponsor the Connecticut Science Educators Annual Conference and the Science Awards Banquet.

Nonmembers may attend CSSA functions but are assessed the actual cost of the programs.
